PLASTIC MATERIAL

Thermal insulation, sound insulation, air ducts, storage trays, bumpers, gaskets

In the automotive and naval sector, cross-linked expanded polyethylene is used in the manufacture of technical and functional components, such as coatings for air ducts, storage trays, bumpers and gaskets. The combination of lightness, flexibility and absorption capacity makes it ideal for the improvement of acoustic comfort, protection and component integration.
Feinrohren products are among the most versatile materials for the manufacture of sun visors, inner door panels, trays, rear-view mirrors, anti-vibration components, gaskets and more.

Application sectors

Automotive
Naval

Custom solutions

Tailor-made solutions developed through couplings and machining for dedicated thermo-acoustic performance.

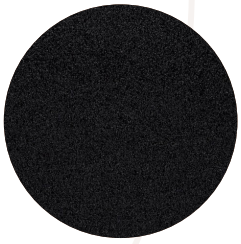

Coatings

HD-Type / 80 kg/m³ / 4 mm
Air ducts

HD-Type / 130 kg/m³ / 4 mm
Door guards

HD-Type / 90 kg/m³ / 3 mm
Boot liners

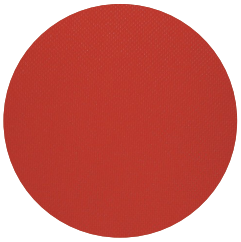

N-Type / 40 kg/m³ / 10 mm
Floating pipes

N-Type / 50 kg/m³ / 5 mm
Sun visors

Soft-Type / 30 kg/m³ / 10 mm
Anti-vibration Fillers

FR Type / 30kg/m³ / 10mm + adhesive layer
Adhesive bumper bands
